

WaterShield™ Dust Control

AVAILABLE ON
THE S30 WITH
SWEEPMAX® PLUS

BENEFITS OF TENNANT ENGINEERED DESIGN

EXCELLENT DUST CONTROL

- Specialized spray angle combined with dual-nozzles helps control dust from side brush.
- Individual water shut-off valves offer ability to run one or two spray nozzles during operation for customized performance.

EASY OPERATOR CONTROL

- The system activates when propelling forward and when side brushes are engaged to prevent spray system from running when stopped.
- Low water level indicator on controls dash lets the operator know when the tank is about to be empty.

HIGH-QUALITY DESIGN

- Integrated check-valves near nozzle help prevent dripping when shutting off system.
- Brass spray nozzles versus plastic for increased durability.
- 11 gal / 41.5 L tank with 304 stainless steel construction helps ensure longevity.
